

Q1

```
import java.util.Scanner;

public class demo {

    public static void main(String[] args) {

        int []arr= {1,1,2,2,2,3,3,4,5};
        int n=arr.length;
        int first=0;
        int second=1;
        while(second<n)
        {
            if(arr[first]==arr[second])
            {
                second++;
            }
            else
            {
                first++;
                arr[first]=arr[second++];
            }

        }
        for(int i=0;i<=first;i++)
        {
            System.out.print(arr[i]+" ");
        }

    }

}
```

Q2

```
import java.util.Scanner;

public class demo {

    public static void main(String[] args) {

        int []arr= {100,200,300,400};
        int k=2;
```

```
int n=arr.length;

int sum=0;
int max=0;

for(int i=0;i<k;i++)
{
    sum+=arr[i];
}

for(int i=k;i<n;i++)
{
    sum-=arr[i-k];
    sum+=arr[i];
    if(max<sum)
    {
        max=sum;
    }
}

System.out.println(max);

}
```
