

Q1

```
import java.util.Scanner;
```

```
public class demo {
```

```
    static void count(String para)
```

```
    {
```

```
        String[] words= {"Car","Truck"};
```

```
        int count=0;
```

```
        int n = para.length();
```

```
        char []arr=para.toCharArray();
```

```
        for(int i=0;i<words.length;i++) {
```

```
            count=0;
```

```
            int j=0;
```

```
            while(j<n)
```

```
            {
```

```
                if(arr[j]==words[i].charAt(0))
```

```
                {
```

```
                    int k=0;
```

```
                    int flag=0;
```

```
                    char arr2[]=words[i].toCharArray();
```

```
                    while(j+k<n && k<words[i].length())
```

```
                    {
```

```
                        if(arr[j+k]!=arr2[k])
```

```
                        {
```

```
                            flag=1;
```

```
                            break;
```

```
                        }
```

```
                        k++;
```

```
                    }
```

```
                    if(flag==0)
```

```
                    {
```

```
                        count++;
```

```
                    }
```

```
                }
```

```
                j++;
```

```
            }
```

```
            System.out.println(words[i]+" came " + count + " times");
```

```
        }
```

```
    }
```

```
    public static void main(String[] args) {
```

```
        count("I have 2 Car one is Baleno Car and other is Farari Car but Truck is used  
for transportation. Truck Car");
```

```
    }
```

```
}
```

Q2

```
import java.util.Scanner;
```

```
public class demo {
```

```
    static void count(String para)
    {
```

```
        int count=0;
        int n = para.length();
        char []arr1=para.toCharArray();
        int j=0;
```

```
        String word = "DAC";
```

```
        char []arr=word.toCharArray();
        int m=arr.length;
```

```
        while(j<n)
```

```
        {
```

```
            if(arr1[j]==arr[0])
```

```
            {
```

```
                int k=0;
```

```
                int flag=0;
```

```
                while(j+k<n && k<m)
```

```
                {
```

```
                    if(arr1[j+k]!=arr[k])
```

```
                    {
```

```
                        flag=1;
```

```
                        break;
```

```
                    }
```

```
                    k++;
```

```
                }
```

```
                if(flag==0)
```

```
                {
```

```
                    count++;
```

```
                }
```

```
            }
```

```
            j++;
```

```
        }
```

```

        System.out.println("word DAC came "+count+" times");
    }

    public static void main(String[] args) {
        count(" Wel come to  CDAC it offers DAC in All CDAC centre.");

    }

}

```

Q3

```

import java.util.Scanner;

public class demo {

    static void check(String para)
    {

        boolean flag=true;
        char []ch = para.toCharArray();
        int n=ch.length;

        int i=0;
        int j=n-1;

        while(i<j)
        {
            if(ch[i++]!=ch[j--])
            {
                flag=false;
                break;
            }
        }

        if(flag)
        {
            System.out.println("Given name is pallindrome");
        }
        else
        {
            System.out.println("Given name is not a pallindrome");
        }
    }

    public static void main(String[] args) {
        check("rajjar");
    }
}

```

```
    }  
  
}
```

Q4

```
import java.util.Scanner;  
  
public class demo {  
  
    static void count(String para)  
    {  
  
        char [] arr = para.toCharArray();  
  
        int n=arr.length;  
  
        int j=0;  
        int count=0;  
        while(j<n)  
        {  
            if(j!=' ' && Character.isLetter(arr[j]))  
            {  
                while(j<n && arr[j]!=' ')  
                {  
                    j++;  
                }  
  
                count++;  
            }  
            j++;  
        }  
  
        System.out.println("no of words "+count);  
    }  
  
    public static void main(String[] args) {  
        count(" Wel come to CDAC it offers DAC in All CDAC centre. ");  
    }  
  
}
```
